

PASSIONATE ABOUT HOSPITALITY

Exciting encounters, romantic declarations of love, celebrated successes, unforgettable stories – the bar creates the perfect backdrop for unique key scenes in countless films and novels, and many cocktails have become world famous thanks to timeless classics.

We normally provide quite a relaxed and calm atmosphere – but it's our real passion to create truly magical and delightful moments for you.

Whether you're in good company or enjoying some quiet moments to yourself.

Our head bartender Matthias Raab has a vast range of drinks for you to choose from. Syrups, infusions and garnishes are made in-house and add refreshing sophistication to his creations, be they with or without alcohol.

His signature drinks are composed with the utmost care and they develop their full flavour on the palate.

If you'd like to find out more, we look forward to welcoming you for a chat.

We are also happy to serve you small snacks and selected dishes prepared in the Finch restaurant kitchen.

Make yourself at home and welcome to bar No. 18.

* At your request, we can provide you with a bar menu with all allergens and additives subject to declaration. If you have any questions, please contact us directly.

WHISK(E)Y

The Scots and the Irish have always held very different points of view about who made the first whisky or Irish “whiskey”. The Irish legend claims that patron saint St. Patrick brought the distilling technique to Ireland ca. 432 AD. However, since St. Patrick was born in Scotland, the Scots maintain that they created the beverage.

The word “whisk(e)y” used today is derived from the Latin word aqua vitae (water of life), which is called “uisge beatha” in Gaelic or “uisce beatha” in Irish. The spellings with and without an “e” are, in principle, both permissible and not legally defined. Whisky, without an “e”, is more commonly used for German, Scottish, Japanese and Canadian whisky, among others. Whiskey with an “e”, is used for Irish, American Bourbon, Tennessee and Rye whiskey. Exceptions are of course possible for some products for historical reasons (e.g. family origin). At the outset, distilling alcohol was reserved only for the monks and served exclusively to produce medicine. During the Middle Ages, the monks spread the art of distilling with the word of God throughout Scotland, Ireland and the European mainland.

The first whisky distillers, who also traded with whisky, were farmers from the highlands who distilled their whisky from the remaining feed barley. After several unsuccessful attempts, whisky was officially taxed in Ireland and Scotland in the middle of the 17th century. Since no one was held to the taxes, production without a state license was banned a little later, which is why many of the sideline distillers emigrated to North America. This was when first Canadian whisky, and later American whisky was born.

WHISK(E)Y STYLES

Depending on the country of origin, there are different whisk(e)y styles:

IRISH WHISKEY STYLES

(at least three years storage in used oak barrels)

Pure Pot Still: 100 % barley, malted and unmalted, triple still distilling

Malt Whiskey: 100 % barley malt, triple pot still distilling

Grain Whiskey: various grains (including wheat or corn), column distilling

SCOTTISH WHISKY STYLES

(at least three years storage in used oak barrels)

Single Malts: 100% barley malt, double or triple pot still distilling

Grain Whisky: various grains (including wheat), column distilling

Blended Whisky: blend of malt whiskies or malt & grain whisky

AMERICAN WHISKEY STYLES

Bourbon/Tennessee: at least 51% maize, pot still and column distilling,
storage for at least two or four years in new, charred oak barrels.

Tennessee whiskey differs only by a further filtration process at the end of the distilling process through sugar maple activated carbon hydrate. This makes it smoother and slightly milder.

CANADIAN WHISKY STYLES

Rye and wheat, column distilling,
at least three years of storage in new or used oak barrels.

R(H)UM / RON

No country is as connected to the fiery beverage as the Central American island of Cuba. However, since rum's raw material is the sugar cane plant, its origin lies in the discovery of the sugar cane in Southeast Asia by Alexander the Great. He brought the meadow grass to the Mediterranean region, where it was cultivated. It was only in the 16th century, after Christopher Columbus, that the Europeans brought the sugar cane into the Caribbean on the small island of Hispaniola.

The first documentary mention of the beverage was the "rumbullion", meaning ruckus or uproar around 1650, and as early as 1667 this beverage was called "ron" (Castilian) or "rhum" (French), then a rather crude distillate, which the Caribbean buccaneers and pirates spread along the coasts of this world and which burned like fire in the throat. It was only in 1703 that the first commercial rum distillery was opened in Barbados.

Cuba's first milder and lighter rum, the "Ron Superior", dates to the Spanish royal house. The nobility demanded a more refined taste and the more sophisticated European distillation methods produced a more delicate rum.

Today, along with the Rhum Agricole sourced from sugar cane juice, there is also Rum (or Spanish Ron) sourced from sugar cane syrup or sugar cane molasses. The latter group represents the most widely used rum category and is divided into light molasses rum (Cuba, Puerto Rico, Dominican Republic), gold or amber rum (Barbados, Central America) and heavy rum (Jamaica and British Guyana). Here, everyone will find something to ideally suit their taste – pure or in a cocktail.

COGNAC

There was once a small Gallic village – no, perhaps another one ...

The history of Cognac dates back to the 13th century, when the inhabitants of the region around the small town of Cognac, 120 km north of Bordeaux, began producing wine and exporting it to England, Holland and Scandinavia. In the 15th century, Dutch merchant ships travelled to Cognac to pick up the famous wines of the region. However, due to their low alcohol content, the wines suffered from the long journeys. So, the Dutch traders started producing wine with a higher alcohol content, the so-called “Brandwijn”, which evolved into the English word “Brandy”. When, at the beginning of the 17th century, the technique of distillation was improved with the introduction of “double distillation”, and the maturity of the wine in casks resulted in a product with increasingly intense character, the time for Cognac had come.

Meanwhile, Cognac is the epitome of French lifestyle and culture. Six “cru” in the region and each cru has its own character.

Fine Champagne can only be produced from the Crus of Grande Champagne (at least 50%) and the Petite Champagne, the two Grand Crus Cognac.

All phases of cognac production are subject to strict regulations and the specification of age is especially important. The quality grades based on storage in wooden casks are as follows:

V.S. or ***: aged min. two years

V.S.O.P. or *****: aged min. four years

X.O.: min. ten years since 2010, six years prior to that. The Napoleon, Vieille Reserve or Hors D'Age categories are also among the X.O. qualities.

SHERRY

Sherry is a white wine whose alcohol content has been increased during fermentation and which matured in a Solera y Criadera system in the triangle of the towns of Sanlúcar de Barrameda, El Puerto de Santa María and Jerez de la Frontera in Andalusia. Fino, Manzanilla and Amontillado are considered dry sherry, while Oloroso is considered middle-sweet and Pedro Ximenez, sweet.

PORT WINE

Port wine, or Port for short, is a sweet Southern wine whose alcohol content (similarly to sherry) was increased during fermentation. It comes from a precisely defined area in the Douro Valley in the north of Portugal. The winegrowing in this region dates to the Neolithic period, but only gained importance with the Romans. The designation "Porto" for wines from this area appeared for the first time in documents from the year 1678. At that time, British merchants were searching for exportable wine in Spain and Portugal. Only monks were then able to produce such wines. The merchants found what they were looking for in a monastery. "Priest Port" was a wine to which neutral alcohol was added during fermentation, which stopped the fermentation process. The unfermented residual sugar of the grapes gives it a sweet character. As a result of the increased storage suitability, port rapidly gained popularity with the British and became an important export item through to today.

GIN

The history of gin began in the 16th century. The English King at the time, William III, was from the Netherlands and brought the “Genever” from his homeland. He made the production of juniper schnapps in England tax-free and subjected French spirit imports with high taxes. This is how the distillate became increasingly affordable and popular among the English people. And finally, Genever evolved into “Gin”.

Today the variety of gins is huge. Different ingredients and botanicals can be used, and many gins today no longer feature the character of juniper or lemons/ oranges in the foreground. Yet another reason to further vary the diversity of gin drinks by using different varieties of gin.

VODKA

Hardly anyone knows that vodka literally means “water”. “The name says it all” ... since clarity and purity are characteristic features of vodka. It originated in Poland and Russia, where as early as in the Middle Ages, efforts were made to produce the best vodka at home and to enrich it with different tastes such as herbs and berries. In the middle of the 16th century, guesthouses (kabaks) were first opened where vodka was served with as a refreshment. After the war against Napoleon, the clear spirit came to France and soon became the favorite beverage of society.

The chemist and developer of the periodic system, Dmitry Mendeleev, is also the “inventor” of “modern” vodka. It is known that he introduced the “gram” unit of measure for vodka, because the so-called “Stopka”, the traditional vodka glass, holds 100 grams. He also wrote his doctoral thesis on vodka and made decisive contributions to the improvement of the manufacturing process. Depending on the country of origin and tradition, different ingredients are used as raw materials, such as wheat – typical in western countries – barley – partly in Scandinavia – rye – traditionally in Eastern Europe – grapes/fruit or molasses in the Caribbean region and Australia. Vodka has strongly influenced bar culture and is the basis for many famous cocktails such as Vodka Martini, White Russian, Bloody Mary, Sex on the Beach or Screwdriver.

TEQUILA AND MEZCAL

1,000 years ago, the Aztecs produced a beverage called Pulque, the fermented basic product from the juice of the agaves. It was most probably the Spaniards who produced the first tequila during the 16th century by distillation. At the beginning of the 19th century, the agave was cultivated around the city of Tequila, in the state of Jalisco, and the spirit took on the name of the region "Tequila"!

Tequila and Mezcal - two Mexican spirits that combine tradition and craftsmanship in every bottle

Tequila is made from the blue Weber agave and comes from specific geographical regions such as Jalisco. Its taste varies depending on the maturation: a Blanco is fresh and clear with citrus aromas, while the Reposado develops gentle notes of vanilla and wood through storage in oak barrels. Whether pure or in cocktails – tequila is versatile and always a pleasure.

Mezcal, its smoky relative, is made from various varieties of agave, often in Oaxaca.

The agave hearts are traditionally roasted in stoves under steam, which gives the mezcal its characteristic, smoky taste. Each variety and region produces unique nuances: from earthy and spicy to fruity and floral. Mezcal is often enjoyed pure to experience its complexity.

Discover the diversity and unique character of Mexico in every sip!
